PROFESSIONAL PROFILE

Results-driven Full-Stack Developer with 5+ years of experience building scalable web and mobile applications across hospitality, technology, and e-commerce industries. Proven expertise in modern JavaScript frameworks including React, Next.js, and the MERN stack, with a strong track record of delivering revenue-generating platforms and innovative location-based solutions. Currently leading the development of Sacavia, a comprehensive discovery platform, while maintaining an active freelance practice that includes creating open-source component libraries and luxury hospitality platforms. Demonstrated ability to manage full project lifecycles from conception to deployment, with specialization in TypeScript, database architecture, and mobile-first responsive design.

CORE SKILLS

Languages: TypeScript, Javascript, SQL, HTML, CSS
Frameworks: Next.js, React, Node.js/Express, MERN, Tailwind, PayloadCMS
Data: MongoDB, PostgreSQL, Prisma, Vercel Blob
Cloud/DevOps: Vercel, Netlify, CI/CD (Github Actions), Render, Docker
Testing/Quality: Jest, React Testing Library
Maps: Mapbox GL JS

WORK EXPERIENCE

Founder & Lead Developer   Sacavia **|** 2025 - Present
Building an innovative location-based discovery platform that connects users with authentic local experiences, events, and hidden gems in their communities.

- Architecting and developing a comprehensive web and iOS application using Next.js, Mapbox, PayloadCMS to deliver real-time location-based discovery experiences for the Boston area.
- Implementing advanced search algorithms and user authentication systems to enable personalized recommendations and community-driven content curation.

Freelancer Full-Stack Developer   CodeWithToni **|** 2020 - Present
Successfully delivered and continue to develop modern, full-stack web and mobile applications for a diverse range of clients, from luxury hospitality to innovative tech startups.

- Developed and launched a high-end, revenue-generating luxury villa rental platform for an international client in the Greek hospitality market, resulting in a 20% increase in online bookings.
- Created and maintain Pioneer UI, a modern component library for Next.js and React Server Components, built with TypeScript, TailwindCSS, and Motion to accelerate development workflows and ensure design consistency.
- Managed the full project lifecycle from client consultation and requirements gathering to deployment and ongoing maintenance, ensuring timely delivery and client satisfaction.
